

# Summary of Eclipse Operations / Spring 2001

- **Objective: start Observations at Perigee + 4.5h: OK**
- **Eclipse Instrument operations globally successful**
  - OM/RGS automatic activation:
    - 19 runs: 16 fully successful
    - 3 failures (Slew/TCLink/XMCS)
  - PN heater problem: Occurred twice (2nd, 4th eclipse)
  - Byproducts: OM keep - alive line test (ICU & DPU)
    - 13 times: 9 OK, 4 corrupted (same ICU location)

New OM activation procedure agreed with PI & tested  
Will save 30 min during next eclipse season

XMM-Newton EPIC TTD Meeting: 6 - 7th June 2001

**XMM**
